

Bonfire Intake

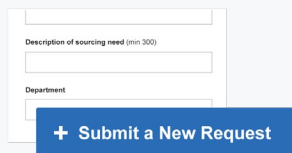

Collaborate with your peers on their procurement requests and start every project strong with a standardized and centralized request process that your colleagues love.

The Challenge

When your procurement requests come through back-and-forth emails (or even a conversation in the hallway), prioritization and planning can be a challenge. Not to mention, when unfamiliar requests come in, you may feel like you're scrambling to attain templates and insights from your peers. To start your projects strong, Bonfire Intake is here to help.

The Solution

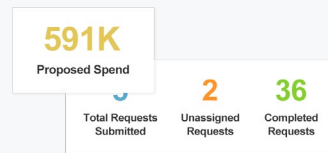

Bonfire Intake formalizes your request process with digital tools that make it easy to work with procurement. Now, you can integrate strategic planning at the start of every project, setting-up all your bids and RFPs to succeed. With in-app benchmarks, guide decision-making by leveraging peer data and insights.

Make it easy to work with procurement with digital tools your colleagues will thank you for.

Add strategic value in project planning with peer data and insights.

Improve project visibility for buyers and requestors with a centralized pipeline and status updates.

Digital tools that remove barriers to procurement

Insights and data to add strategic value during planning

One central online location for all requests

Features designed to strengthen collaboration
